

PROMAX 30 NEW SUPAFLUSH

Descaling pump with flow inverter

Developped for flushing central heating systems to resolve circulation and boiler noise problems caused by accumulations of sludge, corrosion deposits and scale. The NEW SUPAFLUSH pump is able to operate easily to a maximum head of 2 bar and efficiently clean up to 20 radiators. Working fluid temperature up to 50°C - 55°C. Characteristics: multifunction isolation/dump valves with protective plate and 90° rotating fresh water inlet tap; carrying bag with shoulder strap to contain hosesfunnel and selection of various fittings. Optional trolley with large diameter "Stair" wheels and handle that can be tilted up wards.
